006

## PUMPS

Pumps & dispensers for diesel, oil, AdBlue®, water & multi-fluid transfer.

048

## FUEL MANAGEMENT SYSTEMS

Diesel, AdBlue® & oil management and monitoring systems.

060

## FLOW METERS

Mechanical & electronic display flow meters & pulse meters.

072

## HOSES & REELS

Delivery & suction hoses, heating oil lines & hose reels.

088

## NOZZLES

Manual & automatic fuel, AdBlue® & lube oil nozzles.

102

## TANK ALARMS & OVERFILL PREVENTION

Tank level & bund alarms & overfill prevention devices.

110

## TANK & DRUM GAUGES

Mechanical, electronic & sight level gauges for storage tanks.

120

## FILTERS & DE-AERATORS

Fuel filters, filtration units, fuel conditioners & de-aerators.

132

## FILL POINT & VENT EQUIPMENT

Tank filler caps, fill point equipment, vent caps & cowls.

140

## VALVES

Safety, fire, check, foot & isolation valves & IBC/drum valves.

160

## HOSE & PIPE FITTINGS

Hose tails & swivels, hose couplings, pipe fittings & IBC/drum fittings.

182

## WASTE OIL, SPILL, TOOLS & SEALANTS

Waste oil extractors, spill absorbents & engineering tools.

Panther 56

Panther 72

## Piusi Panther 56/72/90

- > Market leading, self priming rotary vane pump for general diesel refuelling
- > Sintered steel rotor and acetal resin vanes
- > Compact cast iron pump body with anti-corrosion paint
- > Mechanical seal for reliability even at low temperatures
- > Integrated bypass valve & 500µ filter accessible for easy cleaning
- > Induction motor with aluminium casing
- > Protection grade: IP55
- > Noise level below 75db
- > Continuous running in open flow (Panther 90 30 min duty cycle)
- > Thermal motor overload

E80

E120

## Piusi E80/120/140

- > Powerful, self priming rotary vane pump for high flow diesel transfer
- > Sintered steel rotor and acetal resin vanes
- > Cast iron pump body with anti-corrosion paint
- > Integrated bypass valve and Viton lip seal
- > Induction motor with aluminium casing and anchoring brackets
- > Protection grade: IP55
- > Noise level below 70db
- > Continuous running in open flow
- > Thermal motor overload
- > **Please note: For E140, suction hose must be 1½" and delivery hose can be up to 8m maximum**
- > **Please note: E140 has opposite flow direction from E80/120**

## Piusi BP3000

- › Low voltage rotary vane pump for mobile diesel refuelling thanks to no mains power needing to be available
- › Sintered steel rotor and acetal resin vanes
- › Compact cast iron pump body with anti-corrosion paint
- › Integrated bypass valve and NBR lip seal
- › Direct current brush motor with permanent magnet stator
- › Pump attachment support bracket
- › Protection grade: IP55
- › Noise level below 70db
- › Available with vertical or horizontal push fit or BSP inlet/outlets depending upon installation preference

## Piusi BP3000 Carry & Battery Kit

### Carry Pump

- › BP3000 diesel pump available as a carry handle kit for easy mobile refuelling
- › Terminal box with on/off switch & 2m cable & clips. 4m options also available on request.

### Battery Kit

- › BP3000 Carry pump as part of a portable, ready to dispense kit
- › Manual Self 2000 nozzle & 4m open ended hose, to be cut down into delivery & suction
- › Extra hose tail for nozzle connection, basket filter & jubilee clips
- › Point of display presentation box

## Piusibox

- › BP3000 low voltage diesel pump as a portable pumping solution in a handy & compact protective carry box
- › Manual Self 2000 nozzle with 3/4" BSP swivel & a shorter spout making it easier to pack back inside the box
- › 2m suction hose & 4m delivery hose ready swaged & c/w swivel
- › Locking vantage foot valve & strainer to prevent leakage of diesel
- › Terminal box with on/off switch & 4m cable & clips
- › 10µ particle filter (Pro models only)
- › All equipment comes virtually assembled for user convenience
- › Ideal for refuelling in heavy duty environments thanks to its protective box preventing contamination e.g. construction sites & agriculture

## Piusi Vantage

- › Low voltage vane pump for refuelling onboard plant equipment with the flexibility to be mounted in various positions
- › Monitors its own operation to slow the pump when it gets hot
- › Sintered steel rotor and acetal resin vanes
- › Cast iron pump body with anti-corrosion paint
- › Direct current brush motor with permanent magnet stator
- › Pump attachment support bracket
- › Protection grade: IP55 & run dry protection
- › Vertical push fit ports
- › LED for monitoring operation status & stored memory events
- › Electronic control box comes mounted on top of the pump as standard, but can be mounted remotely from the pump if required

## Piusi Wall Mounted Kit

- > Plated refuelling pump kits ideal for wall or tank mounting during tank manufacturing or for retrofitting to existing tanks
- > Compact and ready assembled solution for immediate dispensing
- > Choice of flow rate & voltage depending upon which model of Piusi pump is selected
- > Automatic nozzle, nozzle support, 4m delivery hose & check valve
- > Optional mechanical K33 flow meter
- > Protection grade: IP55
- > Metal boxed options available instead of plated for the extra protection of the internal components
- > Optional 2m suction hose kit c/w non-return valve and strainer

## Piusi Cube Range

- > Compact red boxed fuel dispenser for wall or tank mounting
- > Self priming, acetal resin vane pump c/w sintered steel rotor
- > Mechanical seal & integrated bypass valve
- > Nutating disk mechanical flow meter (Pulse version 10:1 - 3 wire)
- > Automatic nozzle c/w flexible hose & swivel connections
- > Nozzle holder with lever pump start and automated pump stop when nozzle is returned
- > Cube 56/70 continuous running, Cube 90 30min duty cycle
- > Protection grade: IP55

## Piusi Pico

- › Compact centrifugal pump c/w priming device for dispensing diesel directly from a drum
- › Universal motor with double-insulated body and in-built switch
- › 4m delivery hose & suction hose with strainer
- › 2" BSP and M 64 x 4 drum connection for direct mounting
- › Options with K24 flow meter & choice of manual or auto nozzle
- › 2m power cables (230v versions), 3m cable & clips (DC versions)
- › Popular refuelling solution in agricultural or work site environments

## Piusi Drum Pump Kit

- › Complete refuelling solution designed for dispensing diesel directly from a drum
- › Differing flow rates and a choice of mains powered or low voltage depending upon which Piusi pump is selected
- › Automatic nozzle, nozzle holster & 4m delivery hose
- › Telescopic suction down tube
- › Quick coupling for easy drum connection & moving from one drum to another
- › Optional mechanical K33 flow meter
- › Popular refuelling solution in agricultural, workshop or construction site environments

## IBC Plated Pump & Suction Kits

### Pump Kits

- > Plated Panther 56 diesel pump designed specifically for dispensing diesel directly from an IBC
- > Automatic nozzle, nozzle support & 4m delivery hose
- > Optional mechanical K33 flow meter
- > Choice of optional bottom or top suction kit depending upon the individual IBC connection

### Suction Kits

- > Bottom suction kit - 60 x 6 Buttress to 1" CAM male, 2m suction hose, non-return valve & Y strainer
- > Top suction kit - 2m x 1" suction hose, non-return valve & basket strainer

## Piusi Pitstop

- > 2 x BP3000 diesel pumps in a sturdy dispensing unit with 14m hose reel c/w hose stop & adjustable arms
- > Designed for refuelling in heavy duty environments where access to the vehicle being refuelling may be difficult & mains power is unavailable
- > Cast iron pump body c/w sintered steel rotor & acetal resin vanes
- > Integrated bypass valve & on/off switch
- > 4m cable & clips for reaching the fill points of larger vehicles
- > Sturdy metal supporting structure with safety guards
- > Automatic nozzle with holster and padlock to lock in place
- > 30µ water & particle filter
- > Protection grade: IP55
- > Popular solution on quarries, large construction sites and mines

## Piusi ST 200 AC

- › 2 x powerful E120 diesel pumps in a sturdy steel frame for high flow, large volume diesel transfer applications
- › Designed for heavy duty environments such as construction sites, quarries and mines where machinery to refuel is typically larger
- › Cast iron pump body c/w sintered steel rotor & acetal resin vanes
- › Integrated bypass valve & on/off switch
- › Protection grade: IP55
- › Allows for the easy installation of an optional K700 flow meter
- › Optional portability kit available as with handle & wheels to help manoeuvre the pump over difficult terrains

## Piusi E300

- › Electric rotary vane pump designed for high flow diesel applications where large volumes need to be transferred
- › Popular for decanting diesel from one tank to another
- › Sintered steel rotor and acetal resin vanes
- › Sturdy cast iron body for heavy duty use
- › Cast iron open impeller
- › Self-priming once it has been initially primed
- › Incorporated check valve in the suction port to prevent the siphoning effect & ensure automatic re-priming
- › Protection grade: IP55
- › Continuous running in open flow

## Piusi EX30 ATEX Fuel Pump

- › Compact rotary vane pump designed to be OEM integrated into a fuel system that is approved as a whole for use in potentially explosive applications
- › Suitable for diesel, petrol, kerosene, AVGAS, AVJET, Aspen 2 & 4
- › For refilling small vehicles e.g. go-karts, jet skis and golf buggies in Zone 1 environments
- › c/w 0.5m supply cable for wiring into junction box
- › Sintered steel rotor and technopolymer vanes
- › Cast iron pump body with anti-corrosion resistant paint
- › Integrated bypass valve with Viton seal
- › ATEX certified: II2G Ex d II A T4 Gb
- › Protection grade: IP55
- › Thermal motor protection

## Piusi Viscomat Vane

- › Electric vane pump for transferring oils & lubricants at higher flow rates
- › Sintered steel rotor, acetal resin vanes & viton lip seal
- › Integrated adjustable bypass valve (only on Viscomat 70)
- › Suitable for continuous running in open flow situations
- › Smooth flow, high suction capacity & low noise level
- › Maximum fluid temperature of +70°C
- › Viscosity up to 500cSt (check oil viscosity at lowest temperature in use)
- › Protection grade: IP55
- › Available in a range of voltages and flow rates

- › Integrated adjustable bypass valve & self priming device
- › Suitable for continuous running in open flow situations
- › Smooth flow, high suction capacity & low noise level
- › Maximum fluid temperature of +70°C
- › Viscosity from 50-2000cSt (check oil viscosity at lowest temperature in use)
- › Protection grade: IP55
- › Available in a range of voltages and flow rates

## Piusi Viscomat Flowmat

- > Viscomat gear pump with pressure switch & safety valve for oil & lubricant transfer at higher pressures
- > Automatically activates when nozzle opens & switches off at the end of delivery for added convenience
- > Aluminium body, sintered steel gears & NBR 902 lip seal
- > Integrated adjustable bypass valve & self priming device
- > Maximum pressure adjustment device
- > Smooth pulse less flow, high suction capacity & low noise level
- > Maximum fluid temperature of +70°C
- > Viscosity from 50-2000cSt (check oil viscosity at lowest temperature in use)
- > Protection grade: IP55

# "Pro + Silent" oil transfer with the Piusi air operated pump range

## Piusi Air Operated Oil Pumps

The Piusi "Pro + Silent" air operated oil pump range is part of their growing offering to the oil & lubrication market. The design of these pumps has been specially considered to ensure high performance and durability in garage and workshop environments.

There are 3:1 and 5:1 ratio models, both available in stub & long length for mounting to a wall or an oil drum:

**3:1** – For pumping medium viscosity oils over short/medium distances

**5:1** – For pumping medium to high viscosity oils over medium/long distances

Features...	
>	3.5:1 & 5.5:1 compression ratio air operated oil transfer pumps
>	Low operating noise & sound proof protective structure limiting noise to 77dB
>	Pneumatic exchanger & three-stage air discharging system
>	Double effect guarantees enhanced efficiency & reduced air consumption
>	Absence of reciprocating mechanical parts that are subject to wearing ensures long working life
>	Supplied with 2" BSP bung adaptor to ensure stable mounting on oil drums or wall bracket
>	Polyurethane internal seals
>	Viscosity up to 550cSt (3:1) and 800cSt (5:1) - check oil viscosity at lowest temperature in use
>	Available in stub (175mm) & long length (940mm) depending upon the installation requirements
>	A range of optional accessories are available to go alongside the pumps (see right)

## Piusi Air Operated Grease Pumps

The Piusi "P60:1 Booster" air operated grease pump range is part of their growing offering to the lubrication market. Their design has been specially considered to ensure high performance and durability in heavy duty garage and workshop environments.

There are three models available; all designed for pumping grease and high viscosity oils at high pressures, over both short and long distances thanks to the high compression ratio.

**470mm** – For 12.5kg drums

**730mm** – For 50kg drums

**940mm** – For 180kg drums

### Accessories...

 12.5Kg Ø 285mm <b>F20792000 - £33.40</b> 50Kg Ø 385mm <b>F20598000 - £44.15</b> 180Kg Ø 610mm <b>F20606000 - £81.00</b>	 12.5Kg Ø 270mm <b>F20793000 - £33.05</b> 50Kg Ø 370mm <b>F20599000 - £38.55</b> 180Kg Ø 690mm <b>F20607000 - £84.30</b>	 12.5Kg 2 wheels <b>F20595000 - £81.00</b> 50Kg 4 wheels <b>F19965000 - £170.85</b> 180Kg 4 wheels <b>F19966000 - £343.40</b>
 <b>F20605000 - £40.40</b>	2m M/F ¼" <b>F20600000 - £20.95</b> 4m M/F ¼" <b>F20601000 - £34.30</b> 6m M/F ¼" <b>F20602000 - £47.20</b>	

### Features...

>	60:1 ratio air operated grease transfer pumps
>	Low operating noise & sound proof protective structure limiting noise to 77dB
>	Pneumatic exchanger & three-stage air discharging system
>	Double effect guarantees enhanced efficiency & reduced air consumption
>	Absence of reciprocating mechanical parts that are subject to wearing ensures long working life
>	Polyurethane internal seals
>	Available with different length suction pipes depending upon the drum size the pump is to be used with
>	A range of optional accessories including drum covers and follower plates are available (see left)
>	Recommended kind of grease: NLGI0 - NLGI1
>	Maximum pumpable viscosity NLG2

## Suzzara Blue AC Pump Only

- > Industry leading self priming 5 chamber membrane pump designed specifically for the handling of AdBlue®
- > Mains powered for fixed pumping installations, seen on many bulk AdBlue® tanks
- > Integrated bypass valve
- > No dynamic shaft seal present to prevent the chance of leaking
- > 2m cable with UK plug (110v and timer version without)
- > Protection grade: IP55
- > Version with or without protected on/off switch
- > Version with timer that switches the pump off after 6 minutes of running to prevent damage to the pump if accidentally left on
- > Uses custom designed 'o' ring sealed plastic fittings
- > Duty cycle: 20mins

## Piusi Elite Three 25 IBC Pump Kit

- › Self priming AC Suzzara Blue membrane pump as part of a higher spec kit for the dispensing of AdBlue® from an IBC
- › Stainless steel plate with robust technopolymer rolls bars for protecting the pump against impact
- › Locking bracket for sturdy mounting of the kit to the IBC
- › SB325 auto nozzle c/w integrated K24 meter and breakaway spout, which detaches if the vehicle being refilled drives away preventing the pump from being pulled with it
- › Version with magnetic spout nozzle to prevent the mis-filling of AdBlue® into the diesel tank
- › 6m EPDM delivery hose c/w stainless steel crimps, 1.5m suction hose & SEC connector
- › High capacity hose holder for neat storage of the delivery hose, and nozzle holster with removable drip cup for easy cleaning
- › AdBlue® long life filter for removing any impurities
- › Protection grade: IP55
- › Duty cycle: 20 mins

## Suzzara Blue Wall Box

- › Self priming AC Suzzara Blue membrane pump as part of a complete kit for dispensing AdBlue® from a bulk storage tank or an IBC
- › Kit comes in a compact and sturdy locking box for security against unauthorised users and protection of the components from tampering
- › Can be mounted on a wall, onto the side of a tank or inside the cabinet or the side of an IBC
- › Auto nozzle c/w holster secured inside the box when closed so that it is only accessible to key holders
- › 4m delivery hose with hook for its neat storage
- › K24 digital flow meter
- › Protection grade: IP55
- › Duty cycle: 20 mins
- › **Please note: Suction hose is not included**

- › Cost effective, electric pump as part of a portable, ready to dispense kit ideal as an economical alternative to a hand pump
- › For the dispensing of AdBlue®, water & light agricultural chemicals from a 205l drum
- › Integrated nozzle holster to neatly store nozzle, preventing it from being accidentally knocked onto the floor and getting damaged
- › Manual nozzle with 2m delivery hose
- › 56x4 Trisure thread & 615-905mm suction downtube
- › c/w transformer to run the pump on both 12v DC and 230v AC

## Piusi Premium Rotary Hand Pump

- > Self priming rotary hand pump with stainless steel casing for reliability & durability when dispensing AdBlue® from 205l drums
- > Smooth operation thanks to its rolling handle grip & quality internals
- > 56x4 drum connector & 3 part suction downpipe
- > Grooved locking mechanism on pump inlet & drum connector to stop it spinning on the drum whilst in operation
- > Version with 2.5m delivery hose & stainless spout available
- > Spout stopper to prevent the gathering of crystallisation (hose version only)

### Piusi Shark Submersible Pump

- › The first submersible pump specifically designed for AdBlue® refilling thanks to its integrated bypass valve allowing nozzle dispensing without the cost of buying a pressure relief valve
- › Low 30mm suction level, meaning the pump leaves less AdBlue® at the bottom of the tank compared to alternative models
- › Pressure regulator optimises flow to reduce energy consumption
- › Strainer to prevent debris from bottom of the tank entering vehicle
- › Version c/w 6min timer to prevent pump from dry running damage
- › Compact dimensions: 140mm diameter x 360mm height

# Say goodbye to costly, throwaway AdBlue® refill bottles with the Delphin PRO

FEATURED

11lpm

MAX FLOW RATE

Mains/  
Battery

POWER

## Delphin PRO AdBlue® Car Dispenser

The Delphin PRO is specifically designed for refilling passenger cars and vans with AdBlue® cleanly & safely in a garage/service environment. It allows AdBlue® to be bought & dispensed from bulk in 200 litre drums rather than small, costly throwaway 5 litre containers.

Tried and tested by leading OEMs and car dealership networks worldwide, the Delphin PRO helps garages and workshops to save money per litre, mechanics' time not having to supervise refills and mess and spills due to the closed connection.

### Versions available:

- › **AC Version** - 230v model for plugging into the mains, popular for when used in a single bay.
- › **DC Version** - Battery powered for moving between bays, c/w 230v charger - can perform 50 fills off a single charge.
- › **Delphin PRO\_X** - Automatic flow rate adjustment to the vehicle tank size instead of the car/van setting, and pre-set function that stops dispensing when set QTY is reached.

### Piusibox AdBlue® Extraction Pump

Before refilling, the car's AdBlue® tank is often emptied to ensure that the new fluid does not get contaminated. This suction kit is designed to cleanly and quickly extract the AdBlue® from the vehicle's tank in a garage/service environment and the scrap/dismantling market.

- › Pump, suction & delivery tubes all come in a handy and compact carry box for the easy transportation and neat packing away of the kit components

### Benefits of the Delphin PRO...

	<b>Closed, clean filling system - No smell, no mess!</b>
1	The refilling process uses a closed circuit meaning no unpleasant odours, no vapours, no spills and no contamination of the stored AdBlue®.
	<b>Fast, automatic re-filling - No need for technicians to supervise!</b>
2	Simply turn it on at the panel and it will dispense AdBlue® automatically into the vehicle until full. The digital meter will display the amount dispensed.
	<b>Patented self-cleaning spout - Maintenance free!</b>
3	Universal ISO connector compatible with any filler cap, which provides a perfect seal when dispensing and ensures no crystallisation gathers on the spout.
	<b>Trolley for various drum sizes - Versatile &amp; handy!</b>
4	Installed on a trolley for easy manoeuvring between bays. Constructed to fit both 60 litre and 200 litre drums securely.
	<b>Adjustable flow switch - To match the vehicle!</b>
5	Depending upon the vehicle being filled you can adjust the dispensing speed from 3 lpm for cars and upto 9/11 lpm for vans via side handle (AC) or it is picked up and adjusted automatically (PRO_X)

# The revamped, modern & user friendly interface of the renown Self Service Desk software

## Piusi Self Service Desk 2018 PC Software

The Self Service Desk 2018 Windows PC software is a revamped version of the market known Self Service Desk. The functionality of the 2018 software is identical to the previous Self Service Desk with all of the familiar features, but benefits from a more modern, attractive and user friendly interface at the computer screen.

See pages 49-51 for compatible FMS units

RELATED PRODUCTS

### Features...

»	Software for use with the Piusi MC Box, Cube & Self Service fuel management system units
»	Same functionality as the original Self Service Desk with a modern, attractive & user friendly interface
»	Allows transaction data e.g. what driver, took how much fuel & when to be conveniently viewed on a PC
»	The 'Site' screen pictorially displays the units you have on site, which you can name for easy identification
»	The 'Report' screen is where you are able to select and filter by dates, drivers, vehicles and/or dispensers and simply view the reports in a table or graph format
»	Ability to export reports into .pdf, .xlsx or .txt file
»	Software can be downloaded from the Piusi website using your allocated licence key or run off a USB
»	Data can be transferred from an onsite dispenser to an onsite PC through hardwiring or a key reader connected to the PC via USB
»	Data can be transferred from up to 16 dispensers on a single remote site to a PC elsewhere via a 4G network if the PW Mobile pack is purchased
»	If upgrading from the original Self Service Desk, you can migrate your old data to ensure no history is lost
»	Additional user keys available for more than 10

### Do I want the download or USB version?

- » **Download** – Recommended, unless there is no internet on site. A licence number is given to download from the Piusi website. If you ever need to reinstall the software, we can reissue the licence number at no cost.
- » **USB** – If you don't have internet connection on site to download the software we can offer you the USB version to run it off. If you lose or break your USB, a replacement needs to be purchased.

# Remote and real-time fuel management with the cloud based B.SMART

**NEW**

## Piusi B.SMART

B.SMART is the first cloud based fuel management system from Piusi, providing the fleet manager with remote and real time data on their fuel use. It enables the monitoring of multiple dispensers across unlimited geographical sites through the user-friendly online web portal via the PC, tablet or smart phone wherever you are!

With no software installation, no network cables and no ongoing subscription fees, the B.SMART is simple to install and costs nothing more to run than your upfront costs.

Features...	
>	Can monitor multiple dispensers across unlimited geographical sites in a single portal, making it suitable for any size fleet or company
>	Once refuelling is completed, transaction data e.g. user, date, time, vehicle, dispenser, site & QTY is sent straight to the cloud to enable real time monitoring*
>	Manager can remotely access data and reports via the cloud-based web portal from any PC, tablet or smart phone
>	Manager can remotely enable/disable driver access to the pump to control who is able to dispense fuel, preventing unauthorised use
>	No software installation required – all you need is a log in, meaning there is nothing to reinstall when a PC is replaced or updated
>	Unlike other cloud based systems, there are no ongoing monthly or annual subscription/hosting fees
>	Ability to export reports into .pdf or .xlsx files
>	Utilises the industry known, Italian quality Piusi dispensers; simple and easy for the driver to use.
>	As standard systems come with licences for 10 or 20 drivers. Additional licences can be purchased separately in packs of 5, 15 or 50.
>	A registered yellow key fob can be used as a back up means of accessing the pump if a driver's mobile device cannot be used e.g. flat battery

**DEMO AVAILABLE**

### How does the B.SMART work...

- > Once the driver has downloaded the B.SMART app on their iOS or Android device, the manager can enable them via the web portal.
- > Whenever they need to refuel, the driver opens the app, selects a dispenser and vehicle, and sets the pump to fill or dispense a pre-set quantity via Bluetooth (works up to 15m away).

- > Once complete, data is sent from the app via Wi-Fi or mobile network to the cloud for the manager to view in the portal.

\*Real time only in areas where Wi-Fi or mobile network is available. Otherwise, data will be synchronised when network becomes accessible.

Code	Description	Extra Licences	Keys	List Price

## Give the manager full control over their fuel, drivers and vehicles with

### FEATURED

### Piusi Self Service 2.0 Range

Self Service 2.0 is the innovative fuel management series for managing and monitoring any 2.0 unit on a site. It benefits from a 'plug and play' real time, interactive PC based software interface with enhanced user functionality for the manager, whilst still providing those dispensing the fuel with the familiarity of the industry known Piusi units.

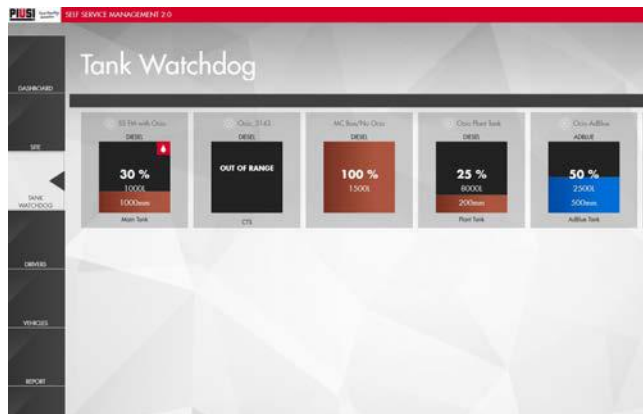

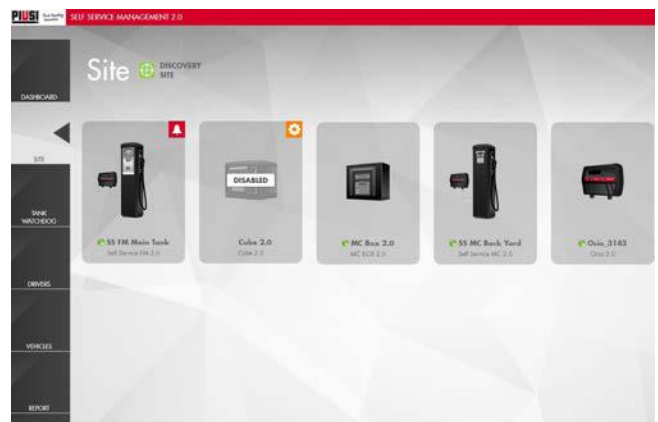

#### 1. Dashboard – View your key data at a glance

- › A widget based, colourful & clear overview of the information recorded by the Self Service 2.0 software
- › Two screens are available for viewing; a dashboard on the 'Site' information and a dashboard on the 'Drivers & Vehicles' data.

#### 2. Site – Set up & view the systems you have on site

- › View all 2.0 systems you have connected to the software PC
- › Name the system for easy identification e.g. Main Tank, Back Yard
- › Select tank fluid to differentiate between diesel & AdBlue® tanks
- › Set a low level tank alarm to warn the software user, or set the pump to stop dispensing when the level is hit
- › Set tank capacity & dimensions from the PC
- › Add storage tank fills (with an Ocio 2.0 connected the increase in level will automatically be detected)

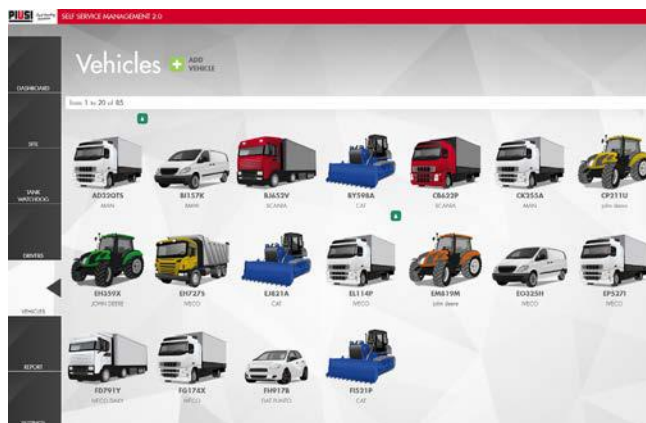

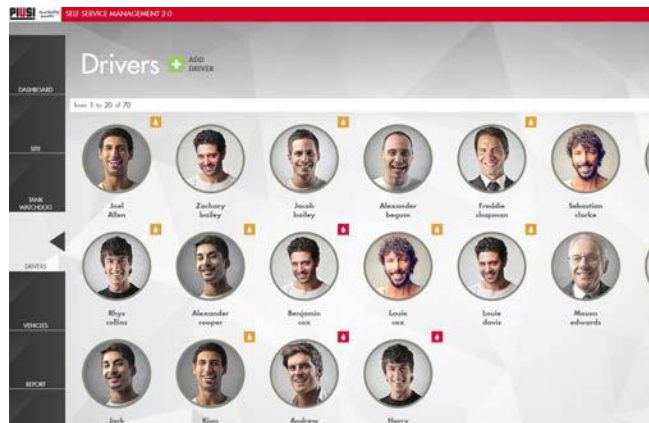

#### 3. Tank Watchdog – Monitor real time fuel levels on site

- › View all tanks, set location name & which systems are installed on the tank for easy identification
- › Visual indication of fluid type & tank level, tank capacity & the percentage of contents remaining
- › Identify tanks that have hit their set low level alarm, alerting the user that a fuel delivery is required
- › View a graph of the fuel level or the level change over a set time period, which helps identify unusual activity

## 4. Drivers – Supervise & monitor your drivers' activity

- See who has taken what QTY of fuel, on what dates, & what vehicles they have refilled to help identify any unusual activity
- Add drivers, amend their details & assign vehicles they can drive
- Disable a driver if they leave the company to prevent them from being able to dispense fuel
- Set driver maximum fuel consumption alarm to warn the software user, or set the pump to stop dispensing when the limit is hit
- Add external refuelling transactions for a true view of total fuel use

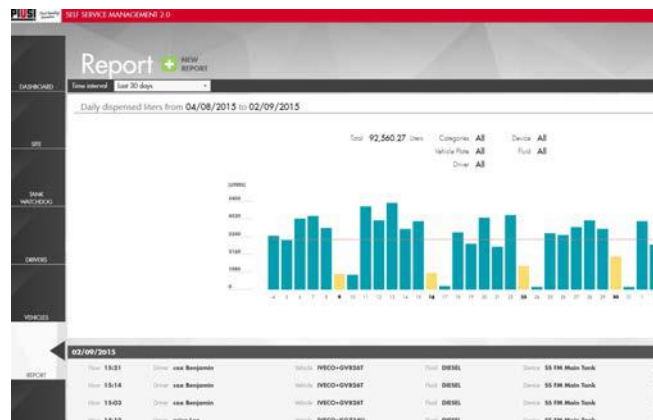

## 5. Vehicles – Manage your vehicles & their fuel use

- See vehicle fuel consumption, the miles it has travelled & how often it is refuelled to help you identify any unusual activity
- View/change the vehicle details e.g. vehicle icon, registration plate & model
- Add a maximum tank size to ensure that no more fuel can be dispensed than what is required for that vehicle
- Set an abnormal fuel consumption alarm to alert the software user or set the pump to stop dispensing when the limit is hit

## 6. Report – Clearly view & export your customised data

- Filter the data you wish to review by time period, vehicle, driver, fluid and device/tank
- Grouped returned data by date, vehicle, driver or device/tank, allowing you to analyse the data as simply as possible
- View the data on screen graphically or export it into a nicely presented PDF file or a functional Excel spreadsheet depending upon user preference

## Self Service 2.0 Software Versions

	SSM 2.0 ENTRY	SSM 2.0 ADVANCED	SSM 2.0 SUITE
<b>TECHNICAL SPECIFICATIONS</b>	<b>2.0 YEAR 2018 SOFTWARE PROGRAM</b>		
<b>DRIVERS</b>	50	250	1000
<b>VEHICLES</b>	50	250	1000
<b>DISPENSERS</b>	2	4	20

<b>SSM 2.0 CLOUD</b>	✓	✓	✓

**Please note:** All 2.0 kits on [pages 57-58](#) include the Advanced software. For other requirements, contact us for a bespoke quote.

### System requirements:

- Requires internet connection via LAN or if PW Mobile pack is purchased, 4G network can send data from remote dispensers to the PC
- Minimum - Pentium 4/AMD Athlon x64, 2Ghz, 2GB RAM, 20GB hard disk space, Windows XP, Vista, 7, 8, 8.1
- Maximum tank capacity of 650,000 litres

## Piusi MC Box 2.0 Kit

- › Cost effective management panel for fitting to existing dispensers
- › c/w 2.0 software for enhanced monitoring of fuel, drivers & vehicles
- › Limits access to authorised drivers & vehicles via electronic keys
- › Records transaction data such as driver, vehicle, date, time & QTY
- › Facility to record vehicle odometer readings
- › Pump start/stop & pre-set dispense features
- › Equipped with a LAN connection box for linking to a PC network
- › Locally holds 500 transactions if network connection is temporarily lost
- › Can be connected to an Ocio 2.0 & nozzle switch

# Manage and monitor garage workshop oil and fluid operations with **MCO GO**

**NEW**

## Piusi MCO GO

The MCO GO is Piusi's brand new, plug and play system to manage and monitor the use of oil and other fluids in a garage environment. Suitable for not just oil but other workshop fluids such as windscreen, AdBlue® and diesel, the MCO GO is a centralised system for monitoring the consumption of all fluids in once place for the manager's convenience.

Simple to install and use, this is the ideal fluid management system for workshops that store fluids in bulk, rather than use costly, throwaway jerry cans and bottles.

See page 26 for air operated oil pumps

RELATED PRODUCTS

See page 86 for oil hose reels

RELATED PRODUCTS

**Cloud Software - Coming Soon...**

- › The optional Cloud software will send the data straight to a user-friendly online portal via Wi-Fi, and provides a more detailed analysis of fluid use and can manage live tank levels to manage stock

### How does the MCO GO work?

- › **Touchscreen control unit** – This is where works orders are created and activated e.g. David to dispense 26litres of SAE 10W-60 Oil at Bay 3, and both scheduled, in progress and completed dispensing operations can be viewed.
- › **8 port switch** – A network device to connect the control unit with upto 6 GPV valves & 1 printer via LAN connection.
- › **GPV valves** – Solenoid valves c/w integrated meter to start the pump dispensing when activated on the touch screen and end it once the set quantity of fluid has been used. You can select up to a maximum of 6 GPV valves depending upon how dispensing systems to want to add.
- › **Optional printer** – for paper copies of each completed operation
- › **Data export** – As standard, the dispensing transactions for the specified period can be exported from the control unit via a USB stick for viewing in spreadsheet format on the manager's computer. Cloud software coming soon.

## Piusi K33 Flow Meter

- > Polybutylene nutating disk meter with mechanical display to measure the quantity of fuel that has been dispensed
- > Suitable for pump installations
- > Meter body can be rotated to allow flow from 4 directions for flexible installation
- > Easy to install and calibrate if required
- > +/-1% accuracy after calibration
- > 3 digit resettable & 6 digit non-resettable totaliser
- > Working temperature -20°C/+60°C
- > Diesel, oil & ATEX version available for use in potentially flammable environments
- > Max viscosity of 2000 cSt (oil version only)

## Piusi K150 Flow Meter

- › Polybutylene nutating disk meter with mechanical display to measure the quantity of fuel that has been dispensed
- › Designed to work in high flow refuelling applications where larger vehicle/machinery tanks are being filled
- › Benefitting from up to 33% less pressure drop than alternative models, maintaining as much as the pump's flow rate as possible
- › Robust aluminium body for durable wear in heavy duty environments
- › +/-1% accuracy after calibration
- › 4 digit resettable totaliser & 8 digit non-resettable totaliser
- › Working temperature -30°C/+60°C
- › ATEX version available for use in potentially flammable environments

## HZ3/5 Oil Meter

- › Mechanical display meter to measure even the smallest quantities of fuel oil consumption with great accuracy
- › HZ3 for horizontal installation in a domestic central oil supply or a one pipe system
- › HZ5 for vertical installations in a single or twin pipe system
- › Robust and durable construction
- › Can be retrofitted to any existing heating/burner system
- › For fitting indoors or in a weatherproof enclosure
- › +/-1% accuracy
- › 5 digit (HZ3) non-resettable totaliser / 7 digit (HZ5) non-resettable totaliser
- › Operating temperature -5°C/+70°C

## WRAS/WRC Approved Water Meter

- › Mechanical display, single jet impeller meter to measure the quantity of cold water used
- › For domestic, industrial & irrigation applications
- › Can be installed horizontally or vertically
- › Integral strainer & security tamper evident wire lock & seal
- › Epoxy coated brass body & frost resistant dial
- › Maximum temperature 30°C
- › WRAS/WRC approved for drinking water
- › Approved: EN14154 +A1+A2, OIML R-49: 2006(E)
- › MID MI-001 suited for secondary billing/sub metering
- › Pulsar option (10ppl) - see table

## Contoil VZO4/8 Oil Meter

- Industry recognised, mechanical display meter to measure small quantities of fuel oil consumption with great accuracy
- VZO4 for domestic heating oil - low flow model for smallest of quantities e.g. single AGA use
- VZO8 for light industrial applications e.g. engine and generators
- Can be retrofitted to any existing boiler/burner system
- For indoor, outdoor vertical, horizontal & diagonal installation
- +/-1% accuracy
- 7 digit non-resettable totaliser & dial indicating 0.009l (VZO4)/ dial indicating 0.09l (VZO8)
- Max operating temperature +60°C
- Version c/w reed switch pulse output to send the consumption information to an external management system or remote display

## Contoil VZO15/25 Oil Meter

- Industry recognised, mechanical display meter to measure fuel oil consumption with great accuracy
- For marine & industrial applications e.g. boilers, engine and generator fuel consumption
- Can be retrofitted to any existing boiler/burner system
- For indoor, outdoor vertical, horizontal & diagonal installation
- +/-1% accuracy
- 7 digit non-resettable totaliser & dial indicating 0.09l (VZO15)/ dial indicating 0.9l (VZO25)
- Max operating temperature +130°C
- Available with Lloyd's shipping, Germanischer Lloyd and Det Norske Veritas (DNV) certification approvals for marine use
- Version c/w reed switch pulse output to send the consumption information to an external management system or remote display

Code	Description	Flow Rate (lph)	Pressure (bar/psi)	Inlet	Outlet	Pulses (Per Litre)	Totaliser	Fluids	List Price

## Contoil VZF Oil Meter

- › Industry recognised, digital display meter to measure fuel oil consumption with great accuracy in lph, kg/h or temperature
- › c/w 4-20mA and pulse output to send the consumption information to an external management system or remote display
- › For marine & industrial applications e.g. boilers, engine and generator fuel consumption
- › Can be retrofitted to any existing boiler/burner system
- › Suitable for indoor and outdoor vertical and horizontal installation
- › +/-1% accuracy
- › 8 digit resettable and non-resettable totaliser
- › Max operating temperature +130°C
- › 0.0001-1000 pulses per litre @ max 200Hz - Configurable 2 to 500ms pulse width
- › Available with Lloyd's shipping, Germanischer Lloyd and Det Norske Veritas (DNV) certification approvals for marine use

## Stainless Steel Flow Meter

- › Turbine meter with digital display to measure the quantity of fluid that has been dispensed
- › Versatile solution for many applications thanks to its large flow range and multiple fluid compatibility
- › IP65 display with 7 digit flow rate indication and 9 digit totaliser for resettable batch or overall total
- › c/w 4-20mA and pulse output to send the information to an external management system or remote display
- › Durable and long life 304 Stainless Steel construction
- › Tungsten carbide bearing/shaft/2Cr13 rotor
- › +/-1% accuracy
- › 7 digit rate and 9 digital totaliser
- › Fluid temperature -10°C/+110°C
- › LCD display powered by AA batteries
- › Max viscosity 100cSt
- › **Please note: Check exact fluid compatibility with wetted parts**

## Piusi K24 Flow Meter

- > Turbine meter with digital display to measure the fluid dispensed & provide user with flow rate indication
- > Bi-directional to allow flow to be counted either way (only on aluminium & ATEX versions)
- > Can be installed inline or by the delivery nozzle & display can be rotated in 4 different positions for easy reading
- > Can work in gravity conditions as well as pump installations
- > +/-1% accuracy
- > 5 digit partial totaliser & 6 digit totaliser
- > Working temperature -10°C/+50°C
- > LCD display powered by two AAA batteries
- > Diesel, ATEX and AdBlue® versions available
- > **Please note: Cattle Milk version is not for human consumption**

## Continental JET™ Ranger Delivery Hose

- › Delivery hose for fuelling commercial & private aircrafts with jet fuel or higher aromatic aviation gasolines
- › Chewigum nitrile synthetic rubber
- › Spiral-plied synthetic fabric & nylon breaker reinforcement
- › Diesel/oil & weather resistant cover
- › 1" BSPT steel hose fittings
- › Temperature range -37°C/+93°C
- › ISO 1307, API 1529:2014 & BS EN 1361 TYPE C approved
- › Available in 4m & 8m assemblies or as an open ended coil depending upon requirements

DIESEL

### High Capacity Diesel Hose Reels

- Automatic spring rewind hose reel designed for low pressure diesel pump systems including refuelling applications
- Thanks to the length of the hose they are ideal for where the vehicle being refuelled cannot easily reach the fuelling station
- ATEX versions for fuel dispensing in explosive environments
- Anti-static hose c/w anti-kink spring at the nozzle end & hose stop
- 4 roller guide to prolong hose life with adjustable arms
- Sturdy steel structure can be wall, floor and ceiling mounted
- 1" M BSP outlet for easy dispensing nozzle connection, which is uncommon on larger reels where conical fittings are often used
- ATEX versions certified: II 2G h IIB T6 T4 Gb -20°C ≤ Ta ≤ +65°C II 2D h III B 20°C 135°C Db -20°C ≤ Ta ≤ +65°C

## ATEX High Capacity Bare Hose Reels

- › Automatic bare hose reel for multi-purpose applications where a longer hose length is needed
- › Spring rewind sturdy mild steel structure for heavy duty conditions
- › Twin pedestal design to enhance performance & reliability
- › Accessible flow path for easy hose installation
- › 4 roller guide to prolong hose life with adjustable hose arms
- › Externally mounted swivel assembly for easy maintenance
- › Can be wall, floor and ceiling mounted
- › ATEX approved to II 94/9 IIB 2 GD c T4 T135 °C X

## Piusi Hose Reel Support Plates

- › Support plates for the sturdy wall mounting of Piusi hose reels
- › Fixed support plate is a cost effective mounting solution when the hose reel is not required to be rotated
- › Rotating support plate is designed for applications where the direction of the hose reel needs to be flexible
- › Small plate models designed for use with Piusi hose reels marked SMALL in the product table

## Piusi AdBlue® Hose Reels

- › Automatic hose reel designed for low pressure AdBlue® pumping
- › Protected latch mechanism to prevent injury to the hands
- › Reduced pressure loss through correct sizing of the hydraulic system
- › Adjustable arm brackets for easy positioning
- › Hose stop for locking at the chosen length
- › Supplied either bare or complete with a choice of hose length
- › Bare reel c/w hose fastening clamp & protection spring

## Braided Flexible Oil Line

- › Braided flexible oil line for connecting pipework to the oil boiler of a heating oil system
- › Inner hose is constructed of UNI9362 nitrile rubber
- › Outer braid is constructed of galvanised steel mesh compliant with ANCC standards
- › Mechanically crimped connection ends
- › Temperature range: -25°C to 90°C
- › Different lengths & inlet/outlet fittings available depending upon individual installation

## ZVA Slimline 2 Auto Nozzle

- High quality, heavy duty model from well known ZVA brand, approved for refuelling in resale pumping applications
- Automatically shuts off when vehicle tank is full
- 2 position stay open latch which can be disabled
- ATEX approved for use in flammable environments
- Supplied as standard with No 4 trigger guard
- Splash guards available upon request
- For pumping systems only

## ZVA 25/32 Auto Nozzles

- › High flow nozzles approved for refuelling in resale pumping applications from well known ZVA brand
- › Automatically shuts off when vehicle tank is full
- › 2 position stay open latch which can be disabled
- › Supplied with black scuff guard
- › Two versions available depending upon the flow rate and pressure requirements of the installation
- › Supplied as standard with No 4 trigger guard
- › Splash guards available upon request
- › For pumping systems only

## Piusi Nozzle Holsters

### Universal Nozzle Holster - Metal

- › Metal, adjustable universal nozzle hanger
- › Designed to fit the Piusi Self 2000, Self 3000 & Piusi Standard Auto nozzle, but accepts most nozzles

### Nozzle Support - Plastic

- › Small, reversible circular nozzle support for resting spout inside
- › Designed to fit the Piusi Self 2000, Self 3000 & Piusi Auto 60 one way, Auto 80 & 120 the other way

**Most Piusi**

## The UK Official Husky Distributor

# What sets the Husky fuel nozzle range apart from other models?

Each nozzle in the Husky range has a selection of enhanced features that ensure both safety and serviceability

**FEATURED**

**Loss motion latch pin** – working in conjunction with a spring loaded diaphragm, it greatly reduces nuisance click offs and splash back spillages

**Patented Flo-Stop® device** – nozzle shuts off when spout is raised above the horizontal or falls from the fill tank to prevent spillages and loss of fuel

**Reinforced spout bushing** – spout tip and inner diameter remain unworn even after excessive use, which prevents nuisance click offs and splash back

**Sensing port behind spout** – positioned behind rather than the end of the spout, ensuring the sensor is not subject to wear that increases its sensitivity and causes nuisance click offs

**Patented Stream Shaper®** - reduces turbulence and velocity for a straighter fuel flow, ensuring less splash back spillage

**Delrin tipped stem** – reduces lever pad wear and allows more positive lowflow shut off

**Torsion clip spring** – enhances lever durability and prevents breakages

**Three position hold open clip** – requires only one hand to open nozzle and then put hold open latch on. If nozzle hits ground, latch flicks off and shuts off flow even when put in lock position

**Increased pressure closing poppet** – when more pressure is applied e.g. someone stands on hose, the poppet shuts the nozzle off to prevent leakage rather than pushing fuel out of spout and onto forecourt

**Anti-air lock feature** – stops nozzle from having to be removed from the hose when priming the pump

### Husky X-Mate Auto Nozzle

- › For non-resale diesel refuelling of commercial vehicles & cars, and pumping systems only
- › Automatically shuts off when vehicle tank is full
- › Flo-stop® device shuts off flow when spout is raised or falls out
- › Smaller OD models for refuelling vehicles with difficult fill points
- › Stream Shaper® as standard on smaller & larger OD models
- › One piece metal casting for durability with mate (half) scuff guard

# Prevent the costly miss-filling of AdBlue® with the SB325\_X magnetic spout nozzle

## FEATURED

SB325\_X Nozzle Meter

**35lpm**  
MAX FLOW RATE

**Auto**  
TYPE

SB325\_X Nozzle

## Piusi SB325\_X AdBlue® Nozzle with Breakaway Spout

The Piusi SB325\_X is designed for the dispensing of AdBlue® and automatically shuts off when the vehicle tank gets full. The magnetic spout versions prevent the accidental yet costly miss-filling of AdBlue® into the diesel tank, by only releasing fluid into a fill point with a partnering magnetic adaptor fitted inside (see diagram).

A version is available with a standard spout rather than a magnetic miss-filling one as a more cost effective solution. Model also available with integrated K24 digital flow meter, for easily monitoring the amount dispensed.

**\*\*SB325\_X is compatible with ZVA Slimline 2 trigger guards**

### How does the miss-filling work?

**Breakaway Spout**  
If the driver drives off with the nozzle left in the vehicle, the spout will detach, preventing the pump from being pulled away with it. The nozzle is easily repaired with a new spout.

### Optional Accessories...

<b>R19172000</b> <b>£56.65</b>	<b>Replacement magnetic miss-filling spout</b> prevents the miss-filling of AdBlue® into a diesel tank by only dispensing into a vehicle that has a magnetic adaptor fitted
<b>R19173000</b> <b>£27.90</b>	<b>Replacement standard spout</b> available to repair the standard nozzle after the breakaway spout mechanism has been in use (non-magnetic)
<b>F15165000</b> <b>£37.90</b>	<b>Elafix 40 vehicle tank magnetic adaptor - Check if you need this part!</b> For retrofitting into the AdBlue® fill point of a vehicle if it doesn't have it fitted as standard
<b>F18400000</b> <b>£23.35</b>	<b>Nozzle override magnetic adaptor</b> allows a magnetic spout to dispense when not in contact with a tank magnetic adaptor e.g. if you have some vehicles with and some without a tank adaptor
<b>F19174000</b> <b>£105.20</b>	<b>Nozzle magnetic adaptor kit</b> is the above adaptor plus the magnetic miss-filling spout as a complete kit

## Fuel Tank Alarm Probes

The CTS fuel tank alarm probes are designed for use with the industry renowned CTS alarms to accurately detect and alert the user of one, a combination, or all of the following tank states:

- ▶ **High fuel level** to help avoid further filling of the tank and an overspill from occurring
- ▶ **Low fuel level** to indicate that stock is running out and a fuel delivery needs to be ordered
- ▶ **Bund alert** to warn that fluid is present in the bund compartment which may indicate a leak or the ingress of rain water
- ▶ As standard, these probes are designed for installation onto steel tanks, for plastic tanks the plastic tank kit is also required

**Single/  
Double**

## Water & Chemical

### Oil Drum

### High viscosity

## Alarm Probes for Other Fluids

### Water & Chemical Probe

- ▶ Single probe for high or low level alerts on water & chemical tanks
- ▶ Please note: Chemical compatibility should be checked

### High Viscosity Probe

- ▶ Single probe for high or low level alerts on tanks containing thick fluids, heavy fuel oils and liquids containing some debris
- ▶ Popular on waste oil tanks
- ▶ For high level also suitable for liquids that crystallise e.g. AdBlue®

### Oil Drum Probe

- ▶ Single probe for alerting of a high oil level in a drum
- ▶ Designed specifically for waste oil storage systems when the user needs to be aware when the container needs to be emptied

## CTS Mains Multi-Zone Tank Alarm

- › Mains multi-channel tank alarm for alerting of a combination or all of the following tank states: high, low and/or bund
- › 90db sounder and flashing orange strobe to warn of a problem
- › Zone in question lights up on screen to indicate the activated state
- › Test and alarm mute functions
- › Automatically reversed float logic for low zones
- › Weatherproof IP55 enclosure
- › Standard box with multiple input voltages 110v/230v, 12v/24v DC
- › Option with relays to connect to external equipment e.g. other alarms or building management systems for remote monitoring
- › Version with relays can be used to control the pump. E.g. where a day tank fills a larger tank, it can automate the pump to run when the tank contents drop to the set low level, and then turn the pump off when the set high level is reached.
- › **Please note: If your configuration is not listed below, select the box only & the probes you need from the opposite page**

## Sophisticated tank monitoring when only one alert is required with the Single Channel Alarm

FEATURED

Single

ZONES

Mains/  
Battery

POWER

See page 103 for  
other fluid probes

RELATED PRODUCTS

### Using the single channel alarm as a remote warning device

- › The mains powered versions of the single channel alarm come with a relay to allow you to connect it to a single relay on another alarm as a remote warning device.
- › The second alarm can be positioned 100m away from the other, inside the office for example, meaning that you don't have to be in sight/ear shot of the tank to be alerted to the problem.
- › The two alarms will act independently from one another meaning that if one of them is muted, the other will continue to sound until it is muted or the zone is unactivated i.e. the problem is solved.

### CTS Single Channel Tank Alarm

Designed for when only one alert is required, the CTS Single Channel Tank Alarm is a more sophisticated and flexible alternative to the Economy tank alarm models on the opposite page.

It can be used to identify and warn of either a high level, low level or fluid in the bund. Once activated the alarm will sound as well as display the name of the activated tank state on the descriptive red LED text display, so that the user can clearly see what the problem is.

#### Features...

›	Single zone tank alarm to warn of either a high level, low level or fluid in the bund depending upon the users' requirements
›	90db sounder & descriptive red LED text display to clearly warn of what the activated tank state is so that the user knows how to take action
›	Test & alarm mute functions
›	Automatically reversed float logic for low zones so that it is ready for use again once the fluid level has increased
›	Weatherproof IP55 enclosure with 4 external mounting lugs
›	Mains, battery & mains with battery back up versions available
›	Battery version has low battery warning for indication that it needs to be replaced
›	Mains versions c/w relay for connecting to external equipment e.g. another alarm or a BMS for remote monitoring of the tank situation
›	Available with 5m fuel probe or without for use with other fluids (select other fluid probe from page 103)

## CTS Economy Tank Level Alarm

- › An economical, entry level tank alarm solution if only one level alert is required
- › Can be used to indicate that the tank level has reached either a high or low state depending upon requirements
- › Battery powered for use on portable installations or sites where mains power is inaccessible
- › Flashing red LED & 90db alarm will sound to alert the user that the set level has been reached
- › Test & alarm mute functions
- › Weatherproof IP55 enclosure with 4 external mounting lugs
- › Simple operation means battery will last in excess of 72 hours in full alarm mode, making it ideal for sites not always manned
- › Version available with 5m diesel/oil probe and version without for use with other fluids (select other fluid probe from page 103)
- › c/w 3 cut to size stickers to name the LED – 2 labelled high & low and 1 blank to name it something else with permanent marker

## Lafon Cleanfill Overfill Prevention

- › European made, automatically operating overfill prevention valve for above ground storage tanks
- › Valve closes when the storage tank is full, to prevent further fluid from being dispensed and spillages from occurring
- › Device can easily be retrofitted to both gravity-fed & pumping installations or installed at tank manufacturing stage
- › Less than one minute re-opening time
- › Wire mesh to prevent debris from affecting the inner workings of the valve
- › EN13616/KIWA BRL-K363 accredited
- › Alloy version for fuel and stainless steel version for AdBlue® tanks available

## GSM Text Alerter

- > Designed for the remote monitoring of low or high level should the user wish to know when the tank needs filling/emptying
- > The unit allows 4 trigger inputs to be set, which upon activation send a text to alert the user of the tank level
- > A customised 30 character SMS can be sent to up to 8 mobile phones e.g. "Back yard fuel tank - low"
- > Can detect a sudden drop in fuel if half full and low level texts are received in short succession indicating a potential theft or leak
- > Weatherproof IP55 rated enclosure
- > Version with diesel/oil probe and version without probes for connecting to another device such as a fuel tank alarm or for use with other fluids (select other fluid probe from page 103)
- > **Please note: A mobile phone & GSM SIM card are required to program and use the unit**

## Unitop Hydrostatic Gauge

- › Pneumatic tank gauge with spring loaded plunger to pull & release to show current tank contents
- › Mechanical display showing tank contents as a percentage (standard version) or in litres (calibrated version)
- › Standard version is fully adjustable between tank heights of 900mm-3000mm
- › Calibrated version for tank heights of 700mm-3000mm
- › Accuracy of +/-2% at full scale
- › Dual scale for horizontal or vertical, rectangular & cylindrical tanks
- › Adjustable second needle for setting the level parameter for when you need to reorder fuel
- › Gauge face dimensions 155mm x 165mm
- › **Please request or download from the website the tank questionnaire for calibrated gauges**

## Normond C/E Hydrostatic Gauges

- > Pneumatic tank gauge with pump up plunger to show current tank contents
- > Large mechanical display showing tank contents as a percentage (E Series) or is calibrated to show volume (C Series)
- > Suitable for tanks up to 3000mm (C Series) or 9000mm (E Series)
- > To work out which E Series gauge you need, take the tank height in mm & select the gauge your tank falls into the middle of
- > Can be positioned up to 50m away from the tank
- > Popular choice for commercial sites thanks to their reliability & robust nature
- > C/E Series gauge face dimensions 165mm x 165mm
- > **Please request or download from the website the tank questionnaire for the calibrated C Series**

## Normond G Hydrostatic Gauge

- > Highly accurate pneumatic tank gauge with pump up plunger to show current tank contents
- > Large mechanical display calibrated to show volume
- > Suitable for most liquids and large tanks up to 10000mm high that may have difficult access
- > Usually selected over the C Series when the tank is too high or the measured fluid is not diesel
- > Can be positioned up to 150m away from the tank
- > Suitable for hazardous environments
- > Please note: No balance chamber or capillary is included. It will be specified upon receipt of questionnaire
- > Gauge face dimensions 165mm x 165mm
- > **Please request or download from the website the tank questionnaire for the calibrated G Series**

Code	Description	Reading Type	Tank Height (mm)	Capillary Length (m)	Balance Chamber Tank Fitting	Balance Chamber Weight	Max Working Temp	Fluids	List Price
OAB6002	Normond Gauge – G Series	Litres	1000-10000				+38°C	D K C	£507.60

## Quantum Manual Hydrostatic Gauge

- › Stainless steel hydrostatic tank gauge with small hand pump mechanism to show the current tank contents
- › Large 160mm mechanical display face calibrated to show tank contents in volume (litres/gallons)
- › 304 grade stainless steel outer casing for heavy duty applications
- › High accuracy of +/-1% at full scale (empty & full scale to be set based on customer preference)
- › For use on any shape tank - Full dimensions must be given
- › Can be positioned up to 20m away from the tank
- › Max tank height 8m (subject to S.G & Viscosity) - 10m on request
- › S.G range - 0.7-1.4
- › 10m capillary with a drop in balance chamber requiring a 1" BSP tank fitting – rigid & magnetic balance chambers on request
- › **Please request questionnaire or download from the website**

## Apollo Oil Tank Gauge

- › Easy to retrofit, ultrasonic tank contents gauge primarily designed for domestic heating oil tanks
- › Transmitter fits on top of the tank & the receiver plugs into a socket inside the property to conveniently display the tank level
- › Receiver has a digital display bar graph reading – 10% tank height per bar for simple visual indication
- › Apollo Visual model also has a transmitter bar graph display for monitoring the tank reading locally as well as remotely
- › Flashing LED to show when tank is empty & fuel is required
- › Transmitter to receiver range is 200m depending on obstacles
- › Receiver: 150-250v, 50/60Hz
- › Transmitter: 3v lithium battery (approx. 10 years)

## Apollo Smart Oil Tank Gauge

- › Easy to retrofit, ultrasonic tank contents gauge primarily designed for domestic heating oil tanks
- › Transmitter fits on top of the tank & the receiver plugs into a wall socket via a transformer to conveniently display the tank level
- › Receiver has a digital display litre & bar graph reading – 10% tank height per bar
- › Transmitter has a local bar graph display for monitoring the tank reading locally as well as remotely
- › Audible low level alarm & anti-theft alarm which sounds if the fuel level drops suddenly
- › Monitors fuel consumption levels in litres & cost by day, week, month or year & the number of days you have until tank is empty
- › Provides room temperature reading & CO2 emission data
- › Transmitter to receiver range is 150m depending on obstacles
- › Receiver: 150-250v, 50/60Hz
- › Transmitter: 3v lithium battery (approx. 10 years)

## Piusi Ocio Fuel Tank Gauge

- › Industry known, continuous reading, hydrostatic tank contents gauge for commercial fuel tanks
- › Digital display reading in percentage, level (mm) or volume (litres)
- › Accuracy of +/-1% at full scale and can easily be calibrated on site
- › Low & high level status alerts can be set up, with flashing LED screen upon activation
- › c/w two configurable relays for connecting to other equipment e.g. a low/high level alarm for audible warning or to automate a pump to run when the tank contents drop to the set low level, and then turn the pump off when the set high level is reached
- › Supplied with 10m of capillary, but can work up to 50m away
- › Versions for diesel and AdBlue®, and optional oil kit available
- › 4-20ma version to send readings to building management systems
- › Tank shapes - vertical cylindrical, horizontal cylindrical & rectangular

## Ocio Desk Software

- › Ocio Desk software connects the Ocio to a PC to allow the viewing of the tank level status direct from the computer
- › Provides visual indication of tank level as well as in percentage, level (mm) or volume (Litres)
- › Current & historic tank level data is displayed graphically which can be used to identify any unusual fuel use
- › Can be set up to update at a specified time interval or when there is a specific variation in level or volume
- › Connection is via USB interface & can transmit data via 2 core screened cable to a PC 900m away (multi-core cable required for multi-tank versions)
- › Can connect up to 12 different tanks' Ocio gauges to the same PC (depending upon software version)

## Ocio GSM

- › Ocio GSM connects to the Ocio gauge & sends the current tank level via SMS for remote monitoring
- › Sends an alert via SMS when the tank level enters or exits the predetermined low/ high level state
- › Can be set up to send a tank level reading in mm at pre-determined timed intervals
- › Tank level readings can be sent on demand by texting the SIM card set up on the GSM unit
- › GSM transmitter can control up to 8 different Ocios via a 9 core screen data cable
- › Max length 9 core screen cable 900m between Ocio & GSM/ Expansion box and 5m between GSM & Expansion box
- › System requires a GSM SIM card with a system supporting up to 10 mobile phone numbers in the built-in phonebook
- › Only compatible with 2G

## Gem Sight Level Gauge

- › A simple & cost effective pull to read gauge to give an instant visual measurement of tank contents
- › Designed for bottom outlet steel & plastic tanks
- › Integrated paper filter with alloy removable bowl for easy cleaning
- › Isolation valve allowing the gauge to be serviced or changed without the need to drain the tank
- › Multi-directional outlet so fuel can be taken from right or left or can alternatively feed two separate boilers
- › Supplied with gauge level marking kit & litre calibration labels
- › Quality corrosion resistant zinc plated brass body
- › Filter service kit available as optional accessory
- › GEM1004 replaces code GEM1000A

## Push Button Sight Level Gauge

- › A simple & cost effective push to read gauge to give an instant visual measurement of tank contents
- › It operates without compromising the tank contents, as when released the tank remains isolated
- › Designed for fitting to bottom outlet steel & plastic tanks
- › Quality corrosion resistant zinc plated brass body
- › Economy push button model or royal version available
- › More advanced Royal model comes with an integrated mesh filter & isolation valve so the gauge can be serviced without draining the tank
- › 4ft and 6ft versions available depending upon tank requirements

## Reservoir Sight Level Gauge

- > A simple & cost effective sight gauge to give an easy visualisation of the fluid level of a reservoir or tank
- > Comprised of a high visibility lens moulded in a shatterproof, transparent polyimide for a clear and instant level indication
- > Outer casing is a high-impact black polystyrene
- > Designed for front or rear installation by just drilling two holes into the tank for the bolts, which once tightened provide a leak free seal
- > For use with mineral & petroleum based oils
- > Different size versions available depending upon the size of the reservoir and the level that the user wishes to monitor

## Piusi Particle Filter

- Particle only filter with resin coated paper element for removing debris out of fuel
- Spin-on cartridge for easy replacement once full
- Can be fitted to the suction or delivery of a pump installation
- Different flow rate versions depending upon requirements
- Complete kit contains one element & one head
- Element thread: 611000 - 3/4" F BSP  
009359000 - 1/4" F BSP

## Ultra Compact Oil Tank Filter Kit

- Bottom outlet oil tank filter assembly c/w Ultra Compact valve for removing debris with instant isolation and no pollution risk
- 40µ cleanable alloy bowl filter & all fittings required for installation
- On other filter valve kits, an isolation valve is not the first part screwed into the tank which means draining the tank if the seal breaks
- Saves the couple of hours it would have previously taken to pump the tank out, replace the filter and seal, and pump the fuel back in
- Isolation valve also available alone to replace the 1" BSPT x 1/2" BSPP adaptor supplied with generic filter assemblies e.g ARMKIT
- Can be retrofitted during service or at the time of installation

## Purafiner Fuel Conditioners

- › Fuel conditioners designed to de-contaminate stored diesel
- › The system uses magnets to break down colonies of bacteria in a fuel tank caused by water contamination
- › They reduce the bacteria into smaller sizes enabling it to pass through a standard filter, preventing your equipment & vehicles from damage that unfiltered bacteria causes
- › Different sized & flow rate versions available
- › FXT & ETA models are constructed from aluminium and used within smaller installations e.g. pumps & generators
- › ETS models are constructed from steel and used within larger installations e.g. steel tanks & marine vessels

# Prevent fuel from getting stagnant & avoid costly damage with the CTS recirculation unit

## CTS Fuel Recirculation Unit

This unit is designed to prevent fuel inside a storage tank from getting stagnant - particularly those with low usage such as generator back up tanks, that whilst not used often are of high importance. By keeping it free of contaminants, damage and downtime to equipment and vehicles the fuel passes through is avoided.

The system draws the fuel up from the front of the tank through the magnetic conditioner, keeping any bacteria microbes dormant, and then through a two stage water and particle filtration process. The fuel is then circulated back into the rear of the tank.

### Benefits...

1	Italian manufactured Piusi Panther pump for long, trouble free service life.
2	Purafiner magnetic fuel conditioner to break up any bacteria growth and prevent filter blockages.
3	Two stage Piusi filtration with bowls to observe and drain any contamination – 30 micron water & particle and 5 micron final finishing particle filter.
4	Internal timer to control the period that the fuel is circulated. This is set as standard to turn over 1.5x the tank capacity every 28 days (the period that it takes for bacteria colonies to form).
5	IP55 rated control panel with large, visible coloured lights for diagnosing any issues that need to be dealt with i.e. Filter blocked and low level/leak/fault.
6	If the flow switch detects a filter blockage, the filter light on the control panel will illuminate and the pump will turn off until the filter is replaced.
7	Input for an alarm/gauge to detect a low level, and a leak probe for a drip tray (if installed). Light illuminates if activated and the pump turns off until action is taken.
8	Two passive BMS outputs for the remote warning of filter block and low level/leak/fault to alert the user that they need to take action.
9	Mushroom style emergency stop button to allow the immediate stop of pump functions by anyone.
10	Plated for sturdy fixing to a metal fuel tank or cabinet.

## PIUSI

**D**  
DIESEL

**O**  
OIL

### Piusi Filtroll

**56lpm**
**MAX FLOW RATE**
**AC/DC**
**POWER**

- › Portable filtration unit for extracting fuel, removing impurities & then dispensing it directly into a vehicle or recirculating it back into the container during tank/IBC cleaning
- › Sturdy trolley unit with large diameter wheels for transportation across uneven ground & drip tray to prevent mess
- › c/w pump, manual nozzle & nozzle support (diesel) or 1" tube (oil)
- › Delivery hose & hose holder for compact & neat storage
- › Suction hose c/w locking Vantage foot valve & strainer which stops diesel leaking out when the system is no longer in use
- › Stage one 30µ water filter & stage two 5µ particle filter for ensuring that maximum contaminants are removed
- › Versions for diesel & oil available in a range of voltages depending upon requirements
- › Oil version has maximum viscosity of 500cSt

Code	Description	Max Flow Rate (lpm)	V	Filter	Nozzle	Hose	Fluids	List Price

## Aluminium Filler Cap

- › Robust filler cap designed to cap off the fill point of a tank or valve
- › Prevents dripping and unwanted debris/water from entering into the tank's fill pipe
- › Complete with chain and 'S' ring to secure the cap to the male threaded fill pipe
- › Two large lugs either side of the cap to enable easy application & removal
- › Comes with either a leather or rubber sealing washer
- › Available in a range of sizes depending on the installation requirements

Code	Description	Material	Seal	Chain	Threads	Fluids	List Price

## Spinsecure Tank Lock

- › Most secure tank lock on the market popular for domestic tanks
- › Fits onto a tank's 2" fill point to secure the contents against theft
- › Patented design means that when cap is locked it spins freely & is almost impossible to remove
- › Padlock free-design with no torque points for crowbar entry
- › High security numbered lock with over 50,000 combinations
- › Simple fitting with no sealants, adhesives or tools required
- › Adaptor available to allow use on 2" F threads

## Lockable Filler Cap

- Use with the lockable fill pipe adaptor to cap off & lock the fill point of a tank (see bottom of page)
- Adaptor fits onto the pipe thread & secured by a screw & the fill cap screws onto the adaptor
- The adaptor's bar is pushed up to prevent the cap from turning
- A padlock (not included) can be applied to keep the bar in position
- Cap & adaptor are sold separately

## Straight Fill Point

- › Designed to allow easy filling of large static tanks from ground level or from a remote location
- › Aluminium fill point nipple with flat face for a good tanker fitting seal
- › Brass fill cap to stop dripping & debris from entering (other fill cap material available)
- › Lever ball valve & non return valve
- › Comes complete with a four hole wall/cabinet mounting brackets
- › Primarily purchased at the tank manufacturing stage for OEM use

SIZE

**TOP ENTRY**  
ORIENTATION

**Please note:**  
Alarms & gauges are purchased separately

## CTS Fuel Tank Fill Point Cabinet

The CTS Fill Point Cabinet makes up part of the increasing range of in-house designed storage tank products. It is designed to securely lock away the fuel tank's fill point from theft and tampering, without making it difficult to view level readings.

The benefit of the CTS fill point cabinet over alternatives on the market is its partial glass front. If an installed gauge is showing a low fuel level, anyone at the tank can identify that a fuel delivery is required even when the cabinet is closed. On other models with a full metal door this would go undetected until the cabinet was next opened, which could result in unexpectedly running out.

Designed for installation onto the side of a steel storage tank, an external bund that the fuel tank sits on/inside, or a wall in remote filling point scenarios. It is also often used as a remote fill cabinet in oil heating installations where the tank is not easily accessed by the fuel delivery driver.

Open - As Supplied

### Benefits...

1	Partial tempered glass front to allow the viewing of alarm/gauges even if locked, meaning that an issue can be detected without accessing the cabinet first.
2	As the glass front is only partial, the fill point is still secured out of sight and reach behind the lockable cabinet door. It is positioned so that if the glass is broken, no syphoning fitting can be attached.
3	Pre-threaded mounting holes on cabinet back plate for simple installation of various alarms and gauges.
4	Removable drip tray with sight glass & easy grip handle. Can be opened even when cabinet is locked to allow convenient emptying/cleaning at all times.
5	Top entry 2" fill point c/w lever ball valve to isolate the line, check valve, union and filler cap to prevent dripping.
6	Top and bottom vents to allow airflow circulation at all times and prevent the build-up of vapour from any excess diesel sitting in the drip tray.
7	4 cable gland cut outs to allow the power cables and gauge tubing to be neatly fixed into the unit.
8	Painted sturdy steel cabinet with lockable door catches and wall brackets for easy tank mounting.
9	Alarms and gauges are available to be purchased separately (see left) to fit inside the cabinet.

## Pressure Relief Angle Check Valve

- › Brass non return valve for fitting to a pump's suction line to prevent line drainage and to keep the pump fully primed
- › Ensures the pressure from the fuel head is held back from the pump
- › c/w pressure relief valve to overcome the pressure build up in pumping systems caused by long hoses, hose reels and hose-runovers
- › Works by venting the pressure back to the tank, preventing damage to equipment such as pump shaft seals leaking and meters cracking
- › F x F BSP threaded inlet/outlet
- › Viton seals and seat

1½" to 2"

SIZE

## Spinsecure Tap Lock

- › High security lock for securing outdoor taps against tampering, vandalism & theft to reduce water bills & prevent flooding
- › Fits most outdoor taps in gardens, holiday homes, allotments, caravan parks, golf clubs, farms and other unmanned properties
- › When locked it spins freely & is almost impossible to remove
- › Padlock free-design with no torque points for crowbar entry
- › Simple fitting with no sealants, adhesives or tools required
- › c/w 2 magnetic keys coded to match the lock. Multiple taps on the same property can be keyed alike so only 1 key is required
- › Handle adaptor version that replaces the handle on your tap also available, which is designed for regular users, as once fitted it never needs to be removed, just unlocked.

**INFORMATION**

## Line Guardian Oil Leak Prevention

This double oil line leak prevention system is designed to avoid loss of fuel and costly environmental clean ups. As well as stopping oil flow in the event of a line leak, the line itself is also less likely to leak in the first place, thanks to its 2 parts:

- 1. The mechanical valve** that connects to the tank outlet only opens if the other end is fully pressurised. If the line splits or has even a pinhole in it, the pressure loss shuts the valve immediately, stopping oil from being released and leaking out.
- 2. The oil line** benefits from a polyamide inner tube with a convoluted stainless outer tube, so that even if the outer tube splits, oil would be kept contained inside the inner tube.

### Benefits...

»	Has fusible plugs at both ends & a trigger in the valve to stop the flow of oil from tank in event of a fire.
»	Full line protection (from valve to tank termination fitting) unlike other systems on the market.
»	Purely mechanical valve ensuring fail safe operation – no electricity or calibration required.
»	Can be used instead of an anti-syphon valve and does not require a vacuum to open.
»	Fuel line has exceptional flexibility and will not crack or break under repeated bending.
»	Suitable for indoor/outdoor installation, top/bottom feed tanks, above/underground with max run of 76m.
»	Easy to install with standard hand tools and a good quality tube cutter for the oil line.
»	System is UL approved and used extensively in Canada and USA.

**Please note:**

The oil line is sold separately to the valve and termination fitting to allow you to choose the length of inner and outer tubing that you need to cut down for your installation length.

## Remote Acting Fire Valve

- › Designed to close off the oil supply to the burner in the event of a fire
- › As a precaution, the valve will not reopen until the manual reset is activated
- › Will not be able to reopen until temperature has fallen to 30°C
- › Brass body c/w copper tube sensor & stainless steel piston
- › Higher flow rate for more industrial applications
- › Horizontal or vertical fitting
- › Suitable for class C & D fuels
- › BSRIA & OFTEC approved to E101

## Fire Valve Tester

- › Safe and reliable unit to test whether a fire valve cuts off as it should during installation and servicing of oil fired systems
- › Adjustable temperature dial to set the unit at the cut off temperature of the fire valve being tested - usually 65°C or 90°C
- › When the temperature is reached an amber light will come on to indicate that the unit is ready to use
- › Insert the valve sensor into the test unit and allow 5 minutes to see whether the valve trips as it should
- › A must have safety item for oil heating engineers as a safer and more accurate testing method than using jugs of hot water
- › Conforms to EN 60730-1
- › Suitable for use with all types of remote acting fire valves

## Cimberio Red Handle Lever Ball Valve

- › Italian manufactured nickel-plated full bore brass lever ball valve designed for starting/shutting off flow
- › Popular in fuel, plumbing, heating & waterworks applications
- › HNBR 'o-ring' & PTFE ball gaskets
- › PN32 (1/4"-2") PN20 (2 1/2"-4") pressure rating
- › Manufactured to EN29000 - ISO9000
- › Available in a range of sizes

## Locking Angle Gate Valve

- › Brass locking angle gate valve designed for starting/shutting off flow
- › Primarily used on the bottom outlet of a gravity fed fuel tank
- › Locking lever allows it to be padlocked when not in use (padlock not supplied)
- › Pressed steel hand wheel for added strength & vandal resistance
- › Used within fuel and water installations
- › PN8 pressure rating
- › M X F threaded inlet/outlet

## Ductile Iron Wafer Butterfly Valve

- › Wafer, butterfly valve designed for starting/shutting off flow
- › Designed to fit in between flanges, making it a compact solution for installations where space is an issue
- › Smaller surface area makes it a cost effective alternative to equivalent valves
- › Handle can be locked in the open or closed position for security or safety
- › Ductile iron body, NBR seal, Stainless Steel disc
- › PN16 pressure rating
- › Wafer pattern to suit ASA ISO flanges
- › Working temperature 0°C/+90°C
- › BS5155 approved

2" to 4"

## Brass Ball Valve c/w Actuator

- › Full bore brass ball valve c/w electric actuator with manual override for automating starting/shutting off flow
- › Being electrically actuated, the valve does not need manually operating making it ideal for remote locations
- › Nickel plated body, chrome plated ball, PTFE seats, FPM O-ring
- › Used within fuel and water applications (WRAS approved)
- › Accepts multiple voltage inputs for installation flexibility
- › 2x volt free outputs SPDT, thermostatic anti-condensation heater, end of travel confirmation and LED actuator status indication
- › F X F threaded inlet/outlet
- › Max working temperature +70°C
- › Protection grade: IP67
- › Configured: Power open/close, stays put on loss of mains power

## Brass Normally Closed Solenoid Valve

- › Normally closed solenoid valve meaning flow is shut off until activated
- › When internal coil is energised, the valve is activated and opens to allow liquid flow
- › Designed for applications where fluid only needs to be released on occasions
- › Brass body & NBR diaphragm suitable for fuels, oils & water
- › Direct acting; no pressure needs to be applied to operate
- › Screwed BSP F x F
- › 100% duty coil supplied with wiring cap

## Piusi Drum Connectors

- › Designed for connecting a pump to a drum or tank
- › Thanks to flanged connection sealing paste or Teflon is not required
- › Integral filter for preventing large particles from entering the pump
- › 1" F BSP inner thread for connection to a suction pipe
- › Integrated check valve with a flange connection option

**1" F BSP**

## Husky High Flow Swivel

- › High flow swivel for use with nozzles when the maximum flow rate achievable needs to be guaranteed e.g.the Husky VIII nozzle
- › For use with nozzles with flow rates up to 375lpm
- › Multi-plane, full 360° spherical rotation for easy nozzle movement
- › Raised stainless steel ball bearings for easy joint movement
- › 75% less back pressure
- › Aluminium, zinc & zinc plated body

**375lpm**

## Hi-Grip Stainless Hose Clamps

- › Hi-Grip hose clips made entirely of 18/8 marine quality stainless steel
- › For hoses with 25mm to 35mm OD, meaning only one version needs to be stocked for a range of applications
- › Suitable for salt water & other highly corrosive environments
- › Lloyd's Register approved for marine, offshore & industrial use
- › All parts certified to BS304 EN1.4301

## Mikalor Supra W2 Hose Clamps

- › Heavy duty hose clips for the most demanding of hose assemblies
- › Swivelling bridge allows the clamp to be mounted in awkward applications without having to remove the hose
- › Can be opened & fastened in place without dislodging other parts
- › Bevelled edges to protect the hose from damage
- › Stainless steel band, class 8.8 bolt, captive nut & spacer system
- › Suitable for industrial, automotive & agricultural machinery hoses

## Reconnectable Safe-T-Break™

- > Breaks off in the event of a vehicle driving off with the nozzle still in the tank
- > Seals off the fuel flow on both sides to prevent spillages
- > Instant closing, dual poppet check valve
- > Can be reused & retains UL approval after reconnection
- > Shock absorbing spring to reduce nuisance breaks
- > Dry reconnect o-ring to prevent fuel spill when reconnecting
- > ATEX approved version available

## Camlock Fittings

- › Camlock fittings are designed to quickly connect & disconnect hoses
- › Aluminium gravity die cast construction
- › When connected these couplings provide a leak-proof NBR seal
- › No tools required for connection
- › Interchangeable with other Camlock fittings made to MIL-C-27487
- › Male BSPT to BS21 / Female BSP to BS2779
- › Available in various configurations and different sizes depending upon the installation requirements
- › Other materials available - please ask

## H Series Compatible Quick Couplings

- › Plated steel, general purpose quick release valved couplings
- › Low pressure drop & instantly seals upon disconnection to prevent any leakages
- › Compatible with Snap-Tite H & US-MIL-C-51234
- › Smooth jet valve design with a safety pin system to prevent accidental disconnection
- › Temperature range -20°C/+100°C
- › Coupler & nipple sold as separate parts

## Piusi HQC Couplings

- › Hose quick release valved couplings including both coupler & nipple components
- › Larger inner bore that minimises resistance in the presence of high flow rates making them ideal for diesel applications
- › Red plastic caps to prevent any leakages of fuel from out the end of the hose when removed
- › Both plastic dust caps & plugs supplied

## Flanged Connections

### Flanges

- › For securing connections between pumping system parts such as pumps, meters & filters
- › 8 screw locations designed to take a M8 hex head nut/bolt

### Flanged Elbows

- › Ideal for compact connection requirements or to change the orientation of an existing flange through 90°
- › Each flanged side has a groove machined to take an o-ring or oval ring depending on connection

### O-ring/Oval Ring

- › O-rings are for connecting the groove of flange to a flat surface without sealants
- › Oval rings are for connecting two groove flanged items together without sealants

See table for flange fitting options

# Our spill kits, branded with your logo to help you get the replacement orders!

## FEATURED

**EnviroSpill**

See page 186 for spill kits

RELATED PRODUCTS

See page 187 for pads only

RELATED PRODUCTS

## EnviroSpill Spill Kit Range

All industrial sites where oils, fuels and chemicals are stored, delivered or handled, should have spill control products at hand ready to deal with a spill simply and quickly should they need to.

EnviroSpill spill kits provide you with everything you need to stop a spill from spreading, clean the spill up and then dispose of it properly. Supplied in a portable and easy to access bag, they are perfect for storing in confined storage cupboards, lorry cabs and work benches.

-  **Oil** – Suitable for oils, fuels, diesel & petrol. Can float on water to separate oil from water.
-  **Maintenance** – Suitable for oils, solvents & water based liquids
-  **Chemical** – Suitable for acids, alkalis, solvents & AdBlue®

## Get your own branded spill kits today!

As spill kits are required wherever fuel, oil or AdBlue is stored, almost all your customers will need them! Make sure you keep getting the repeat orders by putting your name in front of the customer when they have used their kits on site and need to buy replacements.

Simply send us your logo with your first spill kit order and we'll do the rest at **no extra cost!** We'll then keep this on file so that any further orders can go out branded with your details on as standard.

## EnviroSpill Oil Spill Kit

- Spill kit containing everything required to quickly deal with an oil spill in a portable & compact clip close carrier
- For all hydrocarbon based oils, fuels & petroleum based liquids
- Ideal for wherever fuels and oils are stored, delivered & handled
- 1, 2 or 4 spill socks (depending on kit) for absorbing 7.5 litres each
- 3, 5 or 10 spill pads (depending on kit) for absorbing 1.1litres each
- Blue waste bag & tie for proper disposal of used absorbents
- Can float on water – ideal for where water & oil must be separated

## EnviroSpill Absorbent Powder

- › Highly absorbent powder for the clean up of oils, fuels and most chemicals with absolute minimum residue left
- › Provides instantaneous absorption upon contact with liquid for the quick clean-up of spills in minutes whilst repelling water
- › Absorbs 8 times more than mineral absorbents such as clay products, meaning less frequent purchases and 8 times less waste to dispose of
- › Made up of cotton waste and oil-eating microbes, making it a natural, non-abrasive and biodegradable solution
- › Passes the European 3 point directive for landfill disposal
- › Supplied in a 9kg bag
- › Not for use with acids

## EnviroSpill Degreaser

- › Safe, effective and environmentally friendly solution to cleaning grease, oil, wax, gum, dye, inks, smoke and exhaust stains
- › Suitable for cleaning metal, plastic, rubber, porcelain, concrete and wood surfaces
- › Eliminates odours and leaves no residue or slip hazards
- › Industrial strength concentrate containing hydrocarbon eating microbes; not a soap, detergent or solvent
- › Non-toxic, inflammable and biodegradable
- › Bioremediates hazardous hydrocarbons into water vapour and carbon dioxide, reducing the volatility of flammable spills
- › Can be used in pressure washers, soap tanks, steam cleaners or applied by spray, cloth or mop
- › Available in a 1litre bottle or 25 litre container

## EnviroSpill Drum Pallet

**250 or 284 litres**  
CAPACITY

**Maintenance**  
TYPE

- > Drum pallet for complying with oil storage regs & containing any spills to avoid any slip hazards or damage to the environment
- > Sump can hold the contents of a 205litre drum in the event of a leak or rupture
- > Forklift lifting points for easy manoeuvring
- > Self-locating grates lift off for quick clean up
- > Polyethylene construction resistant to chemicals & acids
- > Options designed for holding 2 or 4 drums

Code	Description	Drum Number	Sump Capacity (l)	Dimensions (mm)	Fluids	List Price
SPL-PLT205-2	EnviroSpill 2 Drum Spill Pallet	2	250	1245 x 635 x 457	AF	£248.65

- > Medium strength semi-permanent thread sealant for dismantling with larger hand tools replacing traditional PTFE tape
- > Designed for pipework that may be removed for maintenance
- > Handling: 15-30mins, Functional cure: 1-3 hrs
- > Shock & vibration resistant & suitable for many fluids

Code	Description	Strength	Size	Colour	Temperature	Approval	Fluids	List Price
CTS1905	Loxeal 58-11	Can be dismantled	75ml	Yellow	-55°C/150°C	WRAS/Gas EN751-1	D O P K W	£55.75

## Loxeal 85-21 Pipe Sealant

- > High strength permanent thread sealant for robust, demanding joining applications
- > Designed for pipework that will never be dismantled and for larger machining tolerances
- > Handling: 15-30mins, Functional cure: 1-3 hrs
- > Shock & vibration resistant & suitable for many fluids

Code	Description	Strength	Size	Colour	Temperature	Approval	Fluids	List Price
F12278	Loxeal 85-21	Not for dismantling	250ml	Green	-55°C/150°C	Gas EN751-1	D O P K W	£61.55

Loxeal  
Sealants

USE WITH

## Loxeal 11 Sealant Activator

- > Solvent based sealant activating spray for degreasing and speeding up curing
- > Apply sealant to the male end and activator to the female end
- > Cure time: 20-120 seconds
- > Can be used on flanged or threaded joints

Code	Description	Size	Fluids	List Price
CTS1908	Loxeal 11	200ml	D O P K W	£23.35

## Loxeal 55-03 Thread Locker

- › Medium strength thread sealant for dismantling with hand tools
- › Designed for locking nuts & bolts that may need to be removed
- › Handling: 10-20mins, Functional cure: 1-3 hrs, Full cure: 3-6 hrs
- › Cures effectively even when applied to oily surfaces

**Medium**

**STRENGTH**

Code	Description	Strength	Size	Colour	Temperature	Approval	Fluids	List Price
CTS1914	Loxeal 55-03 50ml	Can be dismantled	50ml	Blue	-55°C/200°C	Gas EN751-1	D O P K W	£29.00
CTS1913	Loxeal 55-03 0.5g Sachet	Can be dismantled	0.5g	Blue	-55°C/200°C	Gas EN751-1	D O P K W	£2.30

## Loxeal 43 Instant Adhesive

- › General purpose glue for bonding surfaces together
- › Works on even difficult to bond, porous or acidic materials e.g. leather, wood, tissue, metal, cardboard & rubber
- › Cure time: 1-20 seconds

**High**

**STRENGTH**

Code	Description	Size	Fluids	List Price
CTS1915	Loxeal 43 Instant Adhesive	20g	D O P K W	£19.30

## Bondseal Industrial Adhesive

- › Adhesive to bond & seal all surfaces when drilling is not desirable
- › Works on oily, wet & difficult surfaces e.g. wood, paper & metals
- › Handling: 15-20mins, Full cure: 12 hrs
- › Impact, shock, weather & chemical resistant
- › Can be painted with water or solvent based paints

**High**

**STRENGTH**

Code	Description	Size	Temperature	Fluids	List Price
CTS1918	Bondseal Industrial Adhesive	310ml Cartridge	-40°C/100°C	AF	£23.05

**Any**

**USE BEFORE**

## Brake & Clutch Cleaner

- › Aerosol cleaning spray that dissolves oil & grease from fittings
- › For use on pipework components prior to thread sealant
- › Ensure that joints are clean & oil free for the best possible bond

Code	Description	Size	Fluids	List Price
CTS1919	Brake and Clutch Cleaner	400ml	D O P K W	£7.95

## Kolor Kut Ullage Paste

- › Ullage, or gauging paste, can be used to indicate the fuel level when no gauge exists
- › Apply to a dipstick and lower into the bottom of the fuel tank
- › The portion of the dipstick that comes into contact with the fuel will change colour
- › Instant detection for all fluids, although heavy oils may take a few seconds
- › It is particularly useful on underground tanks to indicate space remaining

62g

SIZE

See pages 111-119  
for tank gauges

SR7014	Ullage Gauging Paste	62g	Pink to Red	Instant	<b>D O P K</b>	£14.35

## Kolor Kut Water Finding Paste

- › Designed to detect the presence of water in a fuel tank
- › Apply to a clean piece of string or dipstick & lower into the bottom of the tank
- › The brown paste will turn red when in contact with water, indicating its presence
- › Instant detection for all fluids, although heavy oils may take a few seconds
- › If water is found, it is recommended that you buy a water filter and get the tank inspected

## Oil Lifter

- › Designed for domestic heating oil applications when a higher than normal lift is required
- › Sucks up oil & stores in the 3.5l reservoir that feeds the boiler
- › Internal suction solenoid pump ensure continuous oil supply to the heating system
- › Diagnostic flashing LED to alert of a warning situation
- › Max lifting height & distance is based upon using 8m ID tube
- › If fitted inside a building, the drip tray c/w leak detector is required
- › **Questionnaire available for more complex installations**

## A

Absorbents	185-189
Access 85	51
AD nozzle	90
AdBlue, delivery hoses	77-78
AdBlue, flow meters	66-67
AdBlue, gravity hose kits	78
AdBlue, hose & pipe fittings	177
AdBlue, hose reels	85
AdBlue, IBC connectors	159, 181
AdBlue, nozzles	100-101
AdBlue, overflow prevention	108
Adblue, pumps	31-39
AdBlue, suction hoses	81-82
AdBlue, suction pipes	82
AdBlue, tank gauges	112, 116
Afriso tank gauge	111-112
Air hose reel	86
Air operated pumps	25-29
Alarms, tank	103-107
Angle check valve	142, 146
Angle fuel filter	128
Angle lever ball valve	153
Anti-syphon valve	141
AOD pumps	25, 38
Apollo tank gauge	115
ATEX, flow meters	61-63, 67
ATEX, nozzles	91
ATEX, pumps	17-19
Automatic nozzles	91-95, 99-100

## B

Ball valves	150-153
Basket strainers	127
Battery kits	8-10
Biodiesel filter	121, 123
Bi-pump	9
Black iron fittings	175-176
Bowl filters	121-122, 126
BP3000	8
Braided flexible oil line	87
Brass pipe fittings	171-173
Breakaway couplings	165
B.SMART	53
Bucket pump	30
Bund alarm	104-107

## C

Camlock fittings	166
Cannister filter	122-125
Caps, fill	133-135
Caps, vent	138
Carry frames	45
Check valves	145-149
Chemical, hand pumps	43

Chemical, nozzles	89, 90, 99
Cimtek filters	123-125
Cleanfill OPV	108
Compression fittings	172
Coolant, hose reel	84
Couplings, breakaway	165
Couplings, quick release	167-168
Cube	13, 59, 54, 57

## D

De-aerators	128
Delivery hoses	73-79
Diesel, delivery hose	73-76
Diesel, filters	121-125, 130-131
Diesel, flow meters	61-68
Diesel, gravity hose kit	74
Diesel, hose reels	83-84
Diesel, nozzles	89-95
Diesel, pumps	7-19, 40-47
Diesel, suction hoses	80-81
Diesel, tank alarms	104-107
Diesel, tank gauges	111-119
Digital flow meters	66-68
Digital tank gauges	115-117
Dip and fill caps	135
Dispensing nozzle	89-101
Domestic oil meters	63-65
Domestic tank gauges	111, 115-116, 118-119
Drip trays	184
Drum connectors	158-159, 180
Drum pumps	14, 18-19, 23-30, 35-44
Drum taps	158

## E

E80/E120/E140	7
Easyoil nozzle	96
Electronic flow meters	66-68
Electronic gauges	115-117
Engine driven pumps	47
EX30/50/75 pumps	17-18
EX100/140 pumps	18

## F

Fill caps	133-135
Fill point cabinet	137
Fill points	136-137
Filters	121-131
Filtroll	131
Fire valves	144
Fire valve tester	144
Flanged fittings	178
Flare tooling kit	173
Flared fittings	173
Flexible connectors	179
Flexible heating oil line	87
Float gauges	111

Flow meters, digital	66-68
Flow meters, mechanical	61-65
Foot valves	147-148
Fuel conditioners	129
Fuel management	49-59
Fuel recirculation unit	130
Funnel, oil	193

## G

Gate valves	154-155
Gauges, tank level	111-119
Gem sight gauge	118
GOK deaerator	128
GOK pressure regulating valve	141
Goldenrod filters	121
GPI flow meter	67
Gravity hose kits	74, 78
Grease, guns	98
Grease, hose reels	85
Grease, nozzles	98
Grease, pumps	29-30
Groz filters	121
GSM text alerter	109

## H

Hand pumps	30, 34, 36-37, 40-44
Heating oil, filters	126
Heating oil, gauges	111, 115-116, 118-119
Heating oil, lines	87
Heating oil, meters	63-65
Heldite	190
Holster, nozzle	92
Hose reels	83-86
Hose swivels	161-162, 164
Hose tails	161, 163, 177
Hoses	73-81
Husky breakaway couplings	165
Husky nozzles	93-95, 99
Hydrostatic gauges	112-114
HZ meters	63

## I, J & K

IBC connectors	159, 180-181
IBC pumps	15, 24, 32-34
Joining compound	190
K200 meter	68, 70
K24 meter	67, 69
K33/K44 meter	61
K40 nozzle meter	97
K400 meter	68, 70
K400 nozzle meter	96
K500 nozzle meter	96
K600 meter	68, 70
K700 meter	62, 70
K900 meter	68, 70
Kolor Kut water finding paste	194

## L

Level gauge	111-119
Lever ball valves	150-153
Lever hand pumps	30, 37, 41-44
Line Guardian leak prevention	143
Locking angle valve	154
Locking tank cap	134-135
Long life flexible oil line	87
Low level alarms	104-106
Loxal thread sealants	191-192
Lube oil nozzles	96-97

## M

Management systems	49-59
Manager key	52, 58
Manual hand pumps	30, 34, 36-37, 40-44
Manual nozzle	89-90, 99-100
MC Box	49, 54, 57
Measuring jugs	193
Meters, flow	61-68
Meters, pulse	69-71
Micromatic coupler	159
MT Profil gauge	111

## N

Non return valves	145-149
Normond gauges	113
Nozzle holster	92
Nozzle meters	96-98, 101
Nozzles, automatic	91-95, 99-101
Nozzles, Husky	93-95
Nozzles, manual	89-90, 99-101

## O

Ocio gauge	116
Oil extractors	183
Oil spill	185-189
Oil, check valve	147
Oil, deaerators	128
Oil, delivery hoses	73-76, 79
Oil, heating filters	126
Oil, flow meters	61, 65-66, 68
Oil, funnel	193
Oil, hose reels	86
Oil, lines	87
Oil, measuring jug	193
Oil, nozzles	88, 96-97
Oil, pumps	20-28, 40-47
Oil, suction hoses	80-81
Oil, tank gauges	111-116, 118-119
Oil, tank lock	134-135
Oval flow meters	68
Overfill alarms	104-107
Overfill prevention valves	108-109

## P & Q

Panther	7, 10
Particle filters	121-125
Petrol, flow meters	61-63, 67
Petrol, hoses	75
Petrol, nozzles	89, 91-92
Petrol, pumps	17-19, 41-44, 46
Pico	14
Piston hand pumps	37
Pitstop	15
Piusibox	9
Plated pumps	11-12, 19, 33-34
Plutone hose	80
Pressure regulating valve	141
Probes, tank alarm	103
Professional nozzle	91
PTFE tape	190
PTO pump	44
Pulse meter displays	71
Pulse meters	69-71
Pumps, adblue	31-39
Pumps, ATEX	17-19
Pumps, carry plates	45
Pumps, diesel	7-19, 40-47
Pumps, hand	30, 34, 36-37, 40-44
Pumps, oil	20-28, 40-47
Pumps, water	37, 44-49
Purafiner fuel conditioners	129
Push button sight level gauge	118
Quick release couplings	167-168

## R

Recirculation unit	130
Reels, hose	83-86
Remote displays	71
Rotary hand pumps	34, 37, 40-44
Royal push button sight gauge	118

## S

Safety breakaway coupling	165
Sealant	190-192
SEC connector	159
Self 2000	89
Self 3000	89
Self Service	13, 50-52, 55-58
Semi rotary hand pump	40
Sight level gauge	118-119
Software, fuel management	52-53, 55-59
Spill kits/pads	185-188
Spillstop OPV	108
Spinsecure tank lock	134
ST 200	16
ST Box	12
ST Plates	11-12
Stainless steel fittings	174

Strainers	127
Submersible pump	38
Suction hose	80-82
Suction pipe	81-82
Suzzara Blue, nozzles	100
Suzzara Blue, pumps	31-33, 35-36
Swivels, hose	161-162, 164

## T

Tank alarms	104-107
Tank cabinet	137
Tank caps	133-135
Tank dryer	129
Tanker fittings	169
Tank gauges	111-119
Tank locks	134-135
Tanker nozzle	90, 92, 94-95
Thread sealant	190-192
Tigerloop deaerators	128
Trigger nozzles	89-101
Turbinox	69

## U & V

Unitel/Unitop	112
User keys	52, 58
Vacubox	183
Vacupress hose	80
Valves, anti-syphon	141
Valves, check	145-149
Valves, fire	144
Valves, foot	147-148
Valves, gate	154-155
Valves, lever ball	150-153
Valves, overfill prevention	108-109
Valves, solenoid	157
Vantage	10
Vent cap	138
Vent cowl	139
Vent valves	139
Viscomat	20-23
Viscotroll	24

## W

Wall mounted pump	11-13, 19, 23, 27, 32
Waste oil drainers	184
Waste oil extractor	183
Watchman gauge	116
Water filters	121-125
Water finding paste	194
Water meter	64, 66-67
Water pumps	42-47

## X, Y & Z

Y strainers	127
ZVA nozzles	90-92, 100

# 2020 Product Catalogue / Vane Information
